- Global periorbital skin rejuvenation by a topical low molecular weight heparan sulfate and a blend of glycoasminoglicans complex.
- Treatement of infraorbital hiperpigmentation with 20% TCA and 10% phenol peel

 Effectiveness of a tissue stabilized-guided subcision procedure for the treatment of cellulite

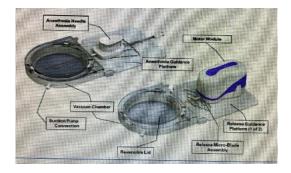

FIGURE 1: An eye cream containing LMW-HS and a proprietary blend of naturally derived extracts improved vascular conditions and hyperpagmentation (12 weeks). Female, 50 y old, Caucasien. Standardized clinical photographs were taken at baseline and week 12 using a VISIA CR Imaging System.

Clinical evaluation of an eye cream containing LMW-HS and a proprietary blend of naturally derived extracts showed total global improvements periorbital condition This test product was highly rated by for efficacy and product attributes and was tolerated

and

blend o

derived

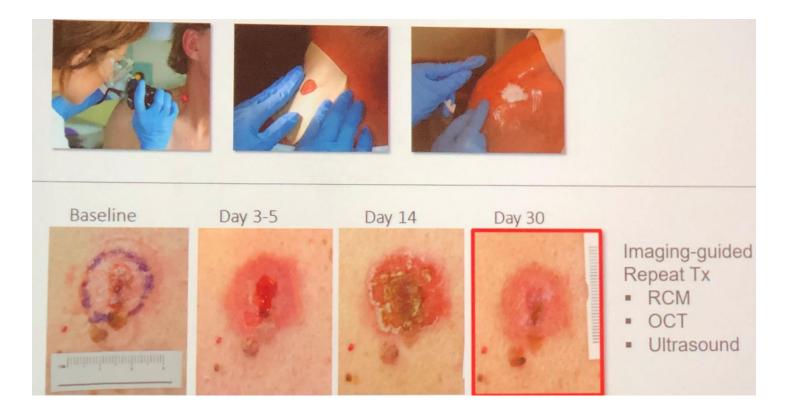

- Pulsed-dyed laser 10mm: 1,5ms, 7,5 J/cm2. 30m ms cooling
- Ablative fractional resurfacing: 15mm, 70 mJ; 40%
- Pintpoint electrosurgery to papular fibrotic lesions
- 0,2 % topical sirolimus ointment bid

LASER ASSISTED DRUG DELIVERY

Laser assisted drug delivery

Ablative CO2 laser: FDT, hypertrophic scars (triamcinolone and 5FU), onychomicosis (amorolfine) and basal cell carcinoma (cisplatin)

SELECTIVE CRYOLYSIS OF SEBACEUS GLANDS

Selective Cryolysis of Sebaceous Glands

- Lipid-containing cells are sensitive to cold injury
- Studied effect of cooling –7 °C for 10 minutes on SG

Mouse ears:

- Histologic damage at 72 h
- Decreased gland size for 1 week

Human backs:

- Sebaceous gland damage
- Reduced sebum output for 2 weeks

LASER HEATING OF GOLD MICROPARTICLES

Laser Heating of Gold Microparticles

Gold Microparticles

- Silica core (120 nm)
 - Gold shell (15 nm)
- PEG coating
- 3 ml suspension

#AAD2019

1-5 MARCH 2019

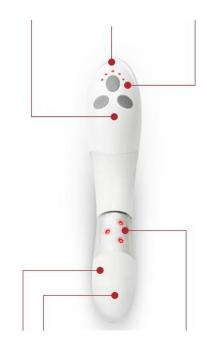

- laser light
- 30 ms
 - 25-35 J/cm²

#AAD2019

- A home led device to improve woman genitourinary health.
- **Early intervention** with fractional ablative laser devices or radiofrecuency improve postmenopaustic women sexual, urogenital distress,, incontinence.
- Clinical trials underway for genitourinary síndrome atrophic vaginitis, urinary incontinence and pelvic prolapse.

V- SCULPT/FIT

Differentiation of Microfocused Ultrasound with Visualization (MFU-V Merz North America) Treatment Using a Customised Management Protocol vs standar treatment.

- Thermocoagulation of dermis and SMAS.
- 50 patiens in the study.
- Pain range 3,3 in analogic scale and satisfaction results 63 patiens agree and 37 strongly agree when treatment is ECO guided vs 43 patiens agree and 23 strongly agree when not ECO guided.
